MUBASHIR PP

Full Stack Developer | MERN Stack

+91 9072190088 | mubashirppofcl@gmail.com | Wayanad, Kerala | Open to Relocation

mubashiir.in | linkedin.com/in/mubashirpp | github.com/mubashirofcl

PROFESSIONAL SUMMARY

Full Stack Developer with production experience building and deploying MERN and Next.js applications, including live client platforms and a full-featured e-commerce system. Skilled in REST APIs, JWT authentication, MongoDB and PostgreSQL schema design, and cloud deployment with Docker, AWS, and GitHub Actions. Builds RAG pipelines with Gemini API and Groq (Llama 3.3), and works as a MERN Stack Developer and AI Engineering Mentor at HACA.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Redux Toolkit, TanStack Query

Backend: Node.js, Express.js, REST API Design, Middleware Architecture, JWT Authentication, Role-Based Access Control, WebSockets

Database: MongoDB (Aggregation Pipelines, Schema Design, Indexing), Mongoose ODM, MongoDB Atlas Vector Search, PostgreSQL, Prisma ORM

AI / LLM: RAG Pipeline Design, Google Gemini API, Groq (Llama 3.3), Vector Search, MongoDB Atlas, Embedding Generation

Microservices & Distributed Systems: Microservices Architecture, API Gateway, RabbitMQ, Event-Driven Architecture, Inter-Service Communication, Synchronous & Asynchronous Communication, Service Discovery, Database-per-Service Pattern, Saga Pattern, Circuit Breaker Pattern, Fault Tolerance

System Design: High-Level Design (HLD), Low-Level Design (LLD), Scalability & Load Balancing, Caching Strategies, Database Sharding, Database Replication, CAP Theorem, Distributed Systems, Horizontal & Vertical Scaling, Design Patterns

DevOps & Cloud: Docker, AWS EC2, AWS S3, CloudFront (CDN), Nginx, GitHub Actions (CI/CD), Vercel, Turborepo, pnpm Workspaces

Integrations: Razorpay, Google OAuth, Cloudinary, Zod, React Hook Form, Python (scripting & API simulation)

AI Tools: Claude Code, Cursor, Antigravity, ElevenLabs

Tools: Git, GitHub, Postman, VS Code, Linux

EXPERIENCE

MERN Stack Developer and AI Engineering Mentor

HACA, Calicut | Full-Time | Oct 2026 – Present

- Work in a combined developer and mentor role, handling development work alongside mentoring.
- Mentor learners across frontend and backend MERN stack curricula and AI engineering.

Freelance Web Developer

Orvyn Labs (Self-Founded) | Jan 2024 – Present

- Run a freelance development practice delivering end-to-end web solutions for real clients, managing requirements, UI/UX design, development, and deployment.
- Delivered and maintain live client projects Azura Resorts (azuraresorts.in) and BIG4 Tiles & Sanitary (big4.co.in).
- Reviewed AI-agent-generated code on BIG4, catching security, database, and deployment risks before production release.

PROJECTS

BIG4 TILES & SANITARY | Full-Stack E-commerce Platform (Live Client) | big4.co.in

Tech: Next.js, Express.js, PostgreSQL, Prisma, WebSockets, Turborepo, Cloudinary

- Worked on a live Turborepo (pnpm) monorepo with Next.js storefront and admin apps and an Express and WebSocket server, using Prisma, Neon PostgreSQL, Cloudinary, and Zod.
- Diagnosed a multi-cause production deployment failure: missing Suspense boundary, Next.js 16.2.x prerendering regression, dependency mismatches, and stale build cache.
- Found and fixed a silent lead-loss bug that was dropping all contact form submissions.
- Remediated an exposed production database credential, a conflicting ISR cache configuration, and Prisma transaction errors before launch.
- Managed Meta ad campaigns with ABO strategy and creative testing, improving Reel hold rate from 5.66% to 19.76%.

NEXTZEN | Full-Stack E-commerce Platform | nextzen.mubashiir.in

Tech: React.js, Node.js, MongoDB, AWS, Docker, Gemini API, Groq

- Architected a production-grade MERN e-commerce platform with separate Admin and User systems, supporting 10+ product categories with variant management, cart, wishlist, and full order lifecycle.

- Engineered JWT authentication with access/refresh token rotation, HttpOnly cookie storage, Google OAuth, and role-based access control, securing 2 distinct user roles across all API routes.
- Designed a normalized MongoDB schema with aggregation pipelines for derived fields (totalStock, minPrice); resolved duplicate index issues, reducing query response time by ~40%.
- Integrated Razorpay payment gateway with signature verification alongside COD and a wallet system, supporting 3+ payment methods with refund logic, coupon engine, and referral rewards.
- Deployed backend via Docker on AWS EC2 with Nginx reverse proxy and Certbot SSL; configured AWS S3 and CloudFront CDN, cutting average media load time by over 60%.
- Built a RAG product chatbot using the Gemini API and Groq (Llama 3.3), connected to the live MongoDB catalog via Express to fetch variant, size, and stock data so answers stay grounded in real product data.
- Configured a GitHub Actions CI/CD pipeline, reducing manual deployment effort to zero on every code push.

AZURA RESORTS | Hospitality Website (Live Client) | azuraresorts.in
Tech: Next.js, Tailwind CSS, Framer Motion, Vercel

- Designed and developed a fully responsive luxury resort website for a real client in Wayanad, delivering the complete frontend independently from design to live deployment.
- Implemented Framer Motion animations and React Lenis smooth scrolling, achieving sub-second page interactions and a premium glassmorphism UI optimised for conversions.
- Configured custom domain DNS on Vercel with Hostinger, managing propagation and HTTPS setup for a zero-downtime production go-live.

ASKMYCV | RAG-Based CV Evaluation Pipeline
Tech: RAG Pipeline, Evaluation Lab

- Built a RAG-based CV evaluation pipeline with an evaluation lab that scores results against ground-truth data.

QUICKMEDI | Medicine Availability Finder
Tech: React.js, Node.js, Python, MongoDB

- Built a full-stack medicine search platform that locates real-time medicine availability at nearby pharmacies using doctor prescriptions as search input.
- Designed a hybrid MERN and Python architecture separating the React frontend, Node.js middleware, and Python data layer, with a Python service simulating pharmacy management APIs.

CERTIFICATIONS

Foundations of Coding Full-Stack
Microsoft, Coursera | Apr 2026 | Credential ID: RYXAW17HITHH

EDUCATION

Bachelor of Computer Applications (BCA)
University of Calicut | Aug 2022 – May 2025 | CGPA: 6.83 (B+)

MERN Stack Development Program
Brototype, Calicut

- Production-focused training in Service/Repository pattern, API-to-UI data flow, MongoDB schema design, and AWS deployment pipelines.
